YEARS AHEAD

EYEON MARINE & OFFSHORE INTERIM PLANNER +

Is your planning giving you headaches? Are your own planners overloaded? Are you starting up new projects or are you in the middle of a planning improvement trajectory and in need of temporary additional planning implementation power? EyeOn offers the “Interim Planner+” concept to help you deal with your operational planning challenges and to get back on track again.

The EyeOn Interim Planner + concept offers you:

- Hands-on planner capacity to do the planning job!
- Planners with excellent educational backgrounds in supply chain and project planning.
- Planners with excellent IT system and planning tool knowledge.
- Planners with first class experience in various planning areas e.g.:
 - Engineering planning
 - Supply chain planning
 - Production planning
 - Project status reporting
 - Multi project reporting

What does the “+” stand for?

The “+” means that the planner has a hands-on mentality and next to that the drive to improve the planning processes from within your own organization. You do not only get temporary planning power but also improved planning processes such that the Interim Planner + can leave your organization again while your planning process itself got a boost. The Interim Planner + will

bring new ideas and the capability to realize significant process improvements. The “+” also stands for the home base of EyeOn business consultants where the Interim Planner + can rely and lean on.

Interim Planning Management:

If you need to go one step further and need temporary planning management capabilities then EyeOn will help you. We can offer experienced managers who can temporarily take over your planning or supply chain management.

The experience of a customer:

Remco Kant, Manager Project Management Organisation (PMO) at Damen Shipyards, The Netherlands

Standardization, Integration, Coordination, Communication (SICC). Four target areas that needed to improve significantly for the Damen E2O projects, hence for the time-management process. Core challenge for aforementioned improvement was the underdeveloped skill of project scheduling.

For this purpose, a team was selected of individuals who were highly motivated and interested in project scheduling. Their core-task: develop a scheduling standard for time-management of E2O projects and improve on the SICC elements. This team was chaired by EyeOn.

Together with this team EyeOn was challenged to: develop, learn, improve, and implement in running projects at the same time. A near impossible task through the pressure of projects in execution.

Under EyeOn’s gentle, persuasive, goal-oriented way of working, the team was able to deliver to its challenges: a planning manual, improved communication in the projects, higher levels of integration between disciplines and sub-contractors and all over improvement on coordination between all parties.

The impacts of the above efforts went further than the E2O projects. Project Schedulers became a necessity and demanded by projects in general, a great cultural change result. The project scheduling knowledge was promulgated into the way of working of the assembly-to-order built vessels, improving these by coordination driven projects too. Results in which EyeOn’s role of Scheduling Ambassador or change-agent have contributed considerably.

What does EyeOn stand for?

EyeOn helps large companies in running the best possible planning process for steering their business. In order to be successful, large companies continuously have to combat the natural tendency to increase internal complexity. EyeOn is convinced that the quality of their planning processes, focusing at driving the business as an integrated whole, is the discriminating factor in this. We help our clients to design, implement and execute excellent planning processes.
